

# Katerack for Florists

The Katerack® is a patent pending design offered exclusively by Dejana Truck and Van Body and its approved distributors. It is designed to offer the most efficient use of your van's cargo area.

Standard configuration is with either two or three pull out shelves. No crawling into the van kneeling on an unseen sharp object or tool. Pullout shelves brings everything that was on the inside within easy reach!

- Each shelf can handle an evenly distributed load of up to 300 lbs.
- Each shelf can be fully extended using heavy-duty commercial grade drawer slides with double locking mechanisms and a center mounted assist handle.
- Shelves are constructed of extruded aluminum perimeter angle and 3/8" thick FRP material.
- Shelving can be adjusted vertically with the use of a 7/32" hex tool aided by the measuring tape markings on each vertical upright.
- Optional ABS molded wall cladding (not shown) is available for van models.
- The lower shelf is deep enough to handle floral sprays and its mounting tripod with the middle shelf adjusted up.
- With the optional "delivery control system" you can keep things from sliding, tipping and turning over!
- The side door area is ideal for larger arrangements!
