

# Lowered-Floor Transit Connect

**Malley Industries is Canada's only Ford-Authorized manufacturer of conversions lowered-floor Transit Connects**

The Ford Transit Connect offers the feel of a car with the cargo room and versatility of a van. With that smaller size comes greater fuel economy and maneuverability, while not sacrificing its utility to a wide range of commercial consumers.

The Malley Industries lowered-floor conversion for the Transit Connect features a 7-inch dropped floor with a manually actuated 60" ramp capable of supporting weights of 600lbs. The interior of the vehicle is lined with our thermo-formed ABS liner package or optional LINERACK cargo liner system for added storage and convenience. Interior packages are available in OEM colour-matched white and grey material.

The Transit Connect is ideal for a wide range of applications, such as moving heavy wheeled equipment like welders and photocopiers.

**Easily transport loads up to 600lbs with the convenience of a small vehicle**
